

Checking your WebMail

Your Webmail can be checked from any computer that is online. This is a great option if you are out of town or away from your computer.

1) Go to <http://YourDomain.com/webmail>.

2) Log into your web mail using Your Full Email Address and Password. (We don't keep track of email passwords, but if you can't remember them we will be glad to reset them to whatever you want)

3) Select either Horde, SquirrelMail or Roundcube to view your emails. Any of them works similarly to your regular email set up.

We do recommend that if you send an email or open an email using webmail that you resend it to yourself. Emails that are sent or read in webmail can't be accessed in your regular email settings.

If you have any questions please contact us at 360.575.9839 or support@omOriginals.com.
